

Key Features

- **Zero-Hour™ Virus Outbreak Protection** – Real-time pattern analysis provides much faster protection than traditional filter and signature based solutions that require detecting, defining, and disseminating new virus information.
- **Inline Antivirus Scanning** – SecurityPlus scans messages inline during each SMTP session effectively stopping malicious software at the email entrance to your network.
- **Urgent Update Notification** – When a high-risk virus threat is identified, you can select to be notified and trigger SecurityPlus to automatically initiate a database update of the latest virus definitions.
- **Versatile Control** – When an infected attachment is detected and you have selected to not block the message outright, you have the option to clean it, quarantine it, delete it, or allow MDAemon's Content Filter to handle it.

Proactive Protection for Businesses Against Spam, Viruses, Phishing and Malicious Email

SecurityPlus for MDAemon complements and extends the built-in security features of MDAemon, providing a shield to stop security trouble before it starts. By combining multiple powerful security safeguards it blocks virtually all known dangers, plus prevents infestation by newly released threats. It proactively protects email users against viruses, spam, phishing attacks, spyware and other types of unwanted and harmful email. It relieves pressure on network resources—including bandwidth, computer resources and time—by refusing entry to troublesome email. This frees an email server to help support improved communications among employees, partners, vendors and customers.

Key Benefits

Proactive Protection. Real-time, heuristic technology analysis of internet email patterns can detect threats often within minutes of an outbreak.

Full Integration. Designed to operate seamlessly with the MDAemon email server providing unparalleled protection of your messaging system.

Accurate Detection. High rate of accuracy in message analysis virtually eliminates the misidentification of legitimate email.

Simple Administration. Automatic update scheduling, administrative log files, a user-friendly web interface and intelligent defaults make protecting your system easy.

Multiple Levels of Protection. SecurityPlus incorporates signature matching, heuristic analysis and “zero hour” antivirus protection to deliver the strongest solution available for the MDAemon email server.

Investment Protection. Includes one year of renewable Upgrade Protection, providing free upgrades to the latest product versions for the duration of the Upgrade Protection term.

The following chart summarizes the performance of the Recurrent Pattern Detection (RPD™) and Zero-Hour™ Outbreak Protection technologies from Commtouch that have been integrated into SecurityPlus for MDAemon. SecurityPlus delivers solid performance to proactively protect the MDAemon email server automatically and within minutes of an outbreak.

Detection within 1 hr of Outbreak

Protection Delay (hh:mm)

No Protection Detected

System Requirements

- Computer with Pentium III 500 MHz (or higher) processor (Pentium 4 2.4 GHz or higher)
- 512 MB of memory (1 GB recommended)
- Microsoft Windows XP/2000/2003 operating system
- Ethernet Network Card
- TCP/IP network protocol installed
- Internet or Intranet communication capabilities
- MDAemon 9.5 or greater
